DUROBASE **WALL PROTECTION**

Virtually indestructible, environmentally friendly and an attractive approach to total wall protection

DuroBase is the unique PLAS-TEX® wall protection system, virtually indestructible and visually appealing. Because it's made from recycled resins and can be recycled as grade #7, it addresses Green Building concerns and has been well received for use in retail shopping centers, warehouses, manufacturing facilities, hotels, motels, commercial kitchens, nursing homes and a host of other commercial applications. It's the only such system that is totally waterproof, mold resistant and very low maintenance. The system, consisting of base molding, chair rail and corner guards, provides cost-effective wall protection and can be specified in several attractive architectural colors including black, sand and gray. The color goes all the way through. Scratches will not show, resulting in extended product life.

Parkland Performance™
WALLS & CEILINGS

Guaranteed wall protection, even in the toughest environment.

The DUROBASE Wall Protection System is made from PLAS-TEX®. A product of proprietary Parkland technology that involves recycling polyethylene and polypropylene into a fiberglass-free material that has been tested by an independent laboratory and found to be highly resistant to the growth of mold, mildew and bacteria.

100% waterproof, the DUROBASE Wall Protection System consists of base molding, chair rail and corner guard and is available in a variety of thickness, heights and lengths (see specifications) as well as a selection of three standard and special-order colors.

BASEBOARD	Virtually Indestructible	Protects Walls from Damage	Waterproof & Resists Mold	Maintenance-Free	Color-Matching Versatility	Decorative Enhancement	Average Lifespan (Years)
Vinyl Cove Base			●		●		1
Ceramic Tile				●		●	3

FEATURES:

- Virtually indestructible, industrial strength baseboards
- 100% Waterproof
- Fiberglass free
- Does not support mold, mildew, or bacteria growth
- Chemically inert
- Color goes all the way through
- Made from 100% recycled resins
- USDA compliant / CFIA approved

BENEFITS:

- Protects walls from forklift, skid, cart, dolly, and luggage damage
- Non-absorbent: no swelling, rotting, or water discoloration
- No irritating, harmful fiberglass dust
- Hygienic: does not contribute to “sick building syndrome”
- Not affected by acids, harsh chemical solvents or petroleum products
- Scratches don’t show - makes for extended product life
- Passes most interior building codes
- Contributes to Green Building: scrap can be recycled as grade #7
- Use in federally inspected food processing plants
