

**The good looks are more than skin deep.
The performance is proven.**

PolyMAX Wainscot® and Plank give you a fine, finished appearance with or without painting or staining. Ideally suited for restaurants, institutions and other demanding commercial applications. Both the reversible planks and the laminated panels go up quickly using Parkland's custom designed adhesives. When installed with matching chair rail and base they create wainscot walls that look great from the start and keep on looking good for years to come. The tongue and groove planks can be creatively installed vertically, horizontally or diagonally to achieve your own design. PolyMAX is 100% waterproof and will not support the growth of mold, mildew or bacteria.

PolyMAX WAINSCOT® & PLANK

FEATURING SOLID AND WOODGRAIN DESIGNS

The original PolyMAX Wainscot® features a smooth surface that can be painted to enhance any interior design and features reversible groove designs. But now we've introduced PolyMAX Woodgrain Wainscot. 100% waterproof, mold and mildew resistant and durable beyond compare, these aesthetically pleasing 48" x 32" panels are ideal for a wide variety of commercial applications. Especially those demanding restaurant environments. The panels, with complimenting chair rail and base molding, will not support mold or mildew and will not harbor bacteria. Maintenance is a snap when your walls stand up to being slapped with a careless mop, splashed with a dash of ketchup or totally saturated with water. In the hospitality business, you've got to deal with reality. But isn't it nice to know you don't have to sacrifice appearance to do it?
