

USE:

SPECTRATILE® products are guaranteed never to waterspot. They are also very damage resistant and can be taken down and scrubbed or power washed and put back up without damage. They are not absorbent and do not harbor mold, mildew or bacteria. For these reasons SPECTRATILE panels have a long service life, and are excellent for healthcare and hospitality--especially food service, and anywhere sanitation is important or moisture can be a problem.

ROUTINE CARE:

SPECTRATILE products feature a factory finish to help protect and beautify the surface. For smooth finished products extra care is recommended to prevent mars or scratches from occurring. SPECTRATILE products are extremely resistant to water, and may be immersed in water during cleaning. SPECTRATILE products are non-absorbent and may be cleaned or scrubbed with water-based cleaners and most commercially-available cleaning products. Follow the recommendations below, in order, to properly clean your ceiling tile product. Always test in an inconspicuous area first.

ROUTINE CLEANING:

Parkland™ SPECTRATILE products guaranteed safe to be cleaned with the following commercially available cleaners.

- Soapy Water
- Mild Detergent Solutions
- Formula 409® All Purpose Cleaner
- Fantastik® Oxypower® Multi-Purpose Cleaner
- Kaboom® with OxiClean Stain Fighter
- Clorox Green Works® Natural Bathroom Cleaner*
- Windex® Multi-Surface Cleaner with Vinegar
- Clorox® Anywhere® Hard Surface™ Daily Sanitizing Spray

Tip: Wipe dry after cleaning to prevent a build-up of soap residue, which can create the appearance of light scratches over time

SPECTRATILE products are suited to most recognized sanitizing procedures. Follow instructions set forth by governing body and test in an inconspicuous area first. Contact Parkland for more information.

APPEARANCE RETENTION:

Parkland SPECTRATILE does not chip or flake. It is guaranteed not to waterspot. If cleaned as needed SPECTRATILE will afford unequalled appearance retention and may never need to be replaced.

AVOID:

Do not use SPECTRATILE products near sources of heat which could elevate temperatures above 140° F. Other restrictions and information may be found in the **Installation Guide, and CSI Specification**. Some strong chemicals are not compatible with SPECTRATILE products; contact Parkland for more information on compatible chemicals. Surfaces exposed to strong chemicals should be promptly flushed with water as contact for even a short period of time may discolor or damage product.
