

**Attractive, performance
proven, waterproof sanitary
walls without the fiberglass.**

Revolutionary PLAS-TEX® Wall Panels provide a logical alternative to fiberglass when the wall needs to be waterproof, sanitary, durable, and easy to clean.

PLAS-TEX helps you build green because it's made totally of recycled plastic and any scrap can be recycled. PLAS-TEX wall coverings go up fast and easy with Parkland Panel Adhesive - a proprietary adhesive with long open time that is applied directly to the wall.

The structural PLAS-TEX Panels, on the other hand, are easily installed with standard steel screws or color-matched rivets. Harmonizing PVC moldings are available and you have your choice of smooth, matte panels or the familiar cracked-ice/pebble texture of FRP.

Panels or flexible wall covering... in either case, the result is a 100% waterproof, highly durable and easy-to-maintain surface. A surface that will not support mold, mildew or bacteria growth and can be cleaned with common household products. PLAS-TEX is an outstanding wall surface for restaurants, kitchens, labs, laundry facilities and other areas that demand waterproof performance as well as a good appearance.

Parkland Performance™
WALLS & CEILINGS

PLAS-TEX® POLYWALL™ & NRP® WALL PANELS

POLYWALL/MATTE TEXTURE

Thickness: .060"
Bright White, Almond*
4' x 8', 10'

NRP/CRACKED-ICE TEXTURE

Thickness: .090"
Bright White, Almond*
4' x 8', 10'

FEATURES:

- 100% waterproof
- Fiberglass-free
- Does not support mold, mildew, or bacteria growth
- Chemically inert
- Color goes all the way through
- Made from 100% recycled resins
- USDA compliant, CFIA approved

BENEFITS:

- Non-absorbent: no swelling, rotting or water discoloration
- No irritating, harmful fiberglass dust
- Hygienic: does not contribute to "sick building syndrome"
- Not affected by acids, harsh chemical solvents or petroleum products
- For interior use
- Scratches don't show
- Extended product life
- Passes most interior building codes
- Suitable for use in federally inspected food processing plants

PLAS-TEX® THICK PANELS

THICK PANELS

Thicknesses: 1/4" - 5/8"
Bright White Matte
1/4" x 4' x 8', 10', 12'
3/8" x 4' x 8', 10', 12'
1/2" x 4' x 8', 10'
5/8" x 4' x 8'

Bright White Cracked-Ice, Almond Cracked-Ice
and Almond Matte are available by Special Order

PLAS-TEX® WALL PRODUCT STRUCTURAL VARIATIONS

The environmentally friendly and absolutely unique PLAS-TEX® surface is also available in structural variations that incorporate a wide range of substrate materials depending on application. DURO-LAM™ Panels, for example, incorporate OSB or lightweight plywood substrate and can be installed directly over studs.

DURO-THERM™ panels feature PLAS-TEX® permanently bonded to a polypropylene fluted substrate that reduces preparation and installation costs by eliminating taping, mudding and sanding. This lightweight, easy-to-install wall system also provides an impressive R3 insulation value.
